SYMBOLIC LOGIC (PHIL 2500H)

Fall Term, 2012 Call Number: 24959

Time: TR (3th) 11:00-12:15 Peabody Hall: Room 219

Text: LOGIC AND RATIONAL THOUGHT

Frank R. Harrison, III

Professor: Frank R. Harrison, III Office: 102, Peabody Hall

Office telephone: 542-2823

E-mail: frharrison108@gmail.com

Office hours: 11:00-3:00 Wednesday or by appointment.

While I have noted that my regular office hours are on Wednesdays from 11:00-3:00, please drop by to see me whenever you wish. Indeed, days other than Wednesday are often better as I also advise undergraduate majors on Wednesday* afternoon. Just send me an e-mail at <<u>frharrison108@gmail.com></u> in order to check if I am in the office at a particular time. Or, better, catch me before or after class.

The unrefined and sluggish mind of Homo javanensis

Could only treat of things concrete
And present to the senses.

--- Willard Van Orman Quine --- philosopher/logician

To educate a man in mind and not in morals is to educate a menace to society.

--- Teddy Roosevelt ---

GOING TO MY WEB PAGE

It will be *important* for you to check in on my Web Page from time-to-time. After you are at my Web Page, I suggest that you book mark it. That will make life easier for you as you have to reenter this page. To go to my web page follow these steps:

- (1) Go to <Department of Philosophy Home Page>;
- (2) on the left side of the screen click on <PEOPLE>;
- (3) in the middle of the screen click <FACULTY>;
- (4) scroll down to <Frank R. Harrison, III> and click on name;
- (5) click on <Dr. Harrison's Web Page>;
- (6) scroll to your appropriate class to read information and print off what you need.

GENERAL COMMENTS

In the following I describe the nature of this course and what is required by it. I consider this syllabus to be a contractual agreement between you and me. From this

syllabus you can ascertain at least the framework of what I expect of you and what you can expect from this course. This syllabus is, therefore, the general guideline for the progression of this course. There may be times when "adjustments" will need to be made. These will be announced in class. It is the responsibility of the student to know of any announcements made in class even if that student is absent on the day of the announcements.

PHIL 2500H is a **math** class. Nonetheless, no previous experience in mathematics is required. The following, however, *are* required for success –

- 1) Devoting, on average, to this class at least two hours of good study time a seven days a week (this will become more mandatory when we move into proofs);
- 2) attending and participating regularly in, all classes;
- 3) paying close attention to correct English usage and grammar;
- 4) treating mathematics like a game similar to backgammon, chess, or checkers; and
- 5) relaxing while learning this game.

If you do not follow these "requirements for success," this class may become difficult to pass! And, yes, Honors Students have done poorly in this class. Some have even failed.

You must complete a Student Data Sheet which is found on my Web Page. On this sheet indicate the name you wish to be called in class. Also indicate if you do **not** want either your local address or your local telephone number to be included in a class directory to be passed out to all members of the class. **You will be required to attach a recent photo of yourself to attach to your data sheet.** (Photos can be obtained at Kinko's if you do not have a recent one.) The Data Sheet is not considered complete without this photo. **You will submit all of this information at the beginning of class, Tuesday, 21 August.**

Not to submit this assignment as specified is reason for withdrawal from this class.

In the autobiographical sketch I invite you to introduce yourself, **as a person**, to me. You may wish to address such questions as "Why am I in an institution of higher learning, and especially the University of Georgia?", "What is required to be successful at the University?", "What do I think relevant to my life in general, and to my university education in particular?", "What are my major likes and dislikes in both 'things' and people?", "What specific goals do I wish to reach in my next seven years? Why do I wish to reach these goals and not some others?", "Do I consider myself a moral person and on what standards of morality?", "Do I hold anything so important that I would be willing to die for it? Why is this so important to me, or why is there not something so important for me?" "Why am I in this class and what do I hope to achieve from it?" These questions are only illustrative of the types of topics you might consider. *Go your own path*.

Remember, I **must** have a good recent photo of you included with this autobiographical sketch. I consider this a necessary condition for you to remain in this class.

Please ask questions in class! If I believe an answer to your question will take too long, is of secondary importance to what is being discussed at that moment, or I plan to discuss it later, then I shall so and then talk with you after class. If I cannot answer your question clearly enough for you, I shall have someone else try. In a math class it is vital that you do not become, and stay, confused even by what may seem the smallest of points! If you have difficulty with something in the book -- either a passage in the text or an exercise -- ask about it in class. Even so, class questioning is not a substitute for rigorous, and constant, preparation. Furthermore, be certain that you have marked the passage or exercise clearly so that you never have to thumb through the book to find what you want. Such fumbling to find what you want only wastes everyone's time.

I shall often ask questions of the class and I expect you to give quick and firm answers. I do not expect you simply to sit with a blank look on your face. I become *VERY* annoyed at such behavior. Remember, you are responsible for **studying** the assigned material **before** coming to class. You will not get very far merely relying on "lectures" and what notes you can take in class! **YOU** are responsible for your own education -- not the professor nor, for that matter, anyone else!

NEVER get behind in your work!! The material builds on itself making it **extremely difficult**, if not impossible, to catch up! I have found in teaching this class over many years that a great cause -- although not the only one -- of poor work, and eventual withdrawal or failure, is lack of personal discipline and responsibility, coupled with little regard for time management.

There are three (3) tests. The tests are cumulative in content. That is, the material covered by any earlier test is required to work any further test and examination. Each test grade will count a third of your final grade. Class participation will be used to determine "borderline cases"; that is, grades within two points of the next higher grade.

Final grades are *NOT* posted, nor given out by the professor in any other form except through the Office of the Registrar.

Makeup tests are given only under the *most pressing reasons* such as serious illness or death in your immediate family. First cousins are not considered "immediate family." Weddings, sport events, field trips in other classes, over sleeping, conflicts with other classes, <u>etc.</u> do not count as reasonable excuses for missing a test. If you know that you may have to miss a test, see me before the fact. If you miss a test because of some emergency, email me as soon as possible. All such absences must be documented.

An unexcused missed test is an automatic **ZERO**.

If, for some reason (e.g., ADD, hypomania, etc.) you require special consideration when taking a test, or in the class in general, please see me as soon as possible.

Even though attendance is not taken daily, it is the better part of wisdom to attend, and *participate* in, ALL classes. Those who do not do this often drop the class, make a poor grade, or fail the course. Further, it is the prerogative of the professor to assign a **WF**, any time during the term, to a student for poor attendance (three or more absences). Note that I do

not automatically drop anyone after four absences. On the other hand, if you stop coming to class but do not officially withdraw from the class, your final grade will be a **WF**. Or if you do not take the final test, no matter what your then current average is, and do not have the approval of the Office of the Vice President of Student Affairs to have missed that final, your final grade for the course will be a **WF**.

 $\underline{\underline{\Gamma}}$'s ("Incomplete") are seldom given in this class, and only under the guidelines set out by the University. An $\underline{\underline{I}}$ must be requested in a formal, typed written letter to the professor. In this letter the student requesting an $\underline{\underline{I}}$ must establish that (s)he has a passing grade at the time of the request and that the reasons for requesting an $\underline{\underline{I}}$ are absolutely nonacademic. Evidence supporting this claim must accompany the request letter. The final decision to give an $\underline{\underline{I}}$ is left to the professor of the class. Any $\underline{\underline{I}}$ must be completed within nine months after it is given. If not, that $\underline{\underline{I}}$ automatically turns into an $\underline{\underline{F}}$. The details of how the $\underline{\underline{I}}$ is to be completed will be written by the professor and then signed and dated by both the student requesting the $\underline{\underline{I}}$ and the professor.

Speaking of grades, a letter from the Honors Program states:

In an effort to battle one of the enduring "urban legends" at UGA, I encourage you to stress to Honors students that it is possible to earn less than an "A" or "B" in an Honors course. Many students currently believe that they cannot earn below a "B" unless their instructor submits a petition to the Director of the Honors Program, and I would appreciate any assistance to dispel this myth. Since Honors courses should require more depth in the students' assignments, additional efforts are required to earn the higher grades that Honors students are accustomed to receiving in regular courses.

I can assure you that in my Honors courses over the years every grade has been earned, "A" to "F," by some students or another. The student, in fact, earns his or her grade. I simply record that grade.

Remember, assignments should *always* be read through *before* the class in which the assigned readings are discussed. Then immediately after that class period you should carefully reread the material and work exercises. Whenever there is anything to memorize, such as definitions or rules, do this <u>as soon as possible</u>. If you do not follow this procedure of preparation and memorization, you will quickly become behind in your work, not understand what is being presented in class, and earn a low or failing grade. No student, including Honors students, has a "right" to a passing grade, much less a high grade.

At the end of this class you will complete a class evaluation. If, while the class progresses, you find *anything* which is not up to what you perceive as an "A" standard, please talk with me about it! This class contains difficult material to teach, and *you* could have some **excellent suggestions** on how to go about doing this -- suggestions which I have not considered. Further, some of my teaching techniques and/or personality idiosyncrasies may be counter-productive for you. We can also talk about these. Perhaps I can change, or perhaps you can come to see why I do what I do -- or a little of both. In any event, if you are dissatisfied with the way something in the class is moving, then, as a student, you have both the right and the obligation to see me about it **as soon as possible**. In particular, do not wait immediately before a test or the end of the class to see me. Then it is far too late!

ASSIGNMENTS

There may well be some flexibility in the following. Changes, if any, will be announced in class. It is always the responsibility of the student to be aware of such announcements even if not in class on the day of an announcement. In any event, the following dates will give you a good indication of what to read and study to keep ahead in this class.

14 August Getting started; Print and read class syllabus; Harrison, Chapter 1

16 August Chapter 1, begin Chapter 2

21 August Chapter 2

Turn in autobiographical sketch with "Student Data Sheet" and a recent photo

23 August Chapters 2 and 3

28, 30 August Chapter 3

4, 6 September Chapters 3 and 5

13-25 September Chapter 5

27 September TEST I

2-9 October Chapter 5

11-25 October Chapter 6

18 October

This is the last day to drop the course with a <u>WP</u>. After this date a student who withdraws, stops coming to class, and the like, will receive as <u>WF</u> as the final grade unless he/she has a written excuse from the Office of the Vice President for Student Affairs.

30 October - 1 November Chapter 7; Sections 1 and 2

6 November TEST II

8-15 November Chapter 10; Sections 1, 2, 3, and 5 Begin Chapter 12

19-23 November Thanksgiving Holiday

27 November – 4 December Chapter 12
Class Evaluations

??? December Test III

Remember that if you have ANY difficulties at all with this course, or with me as the instructor, see me at once. I do not breathe fire and spit brim stone outside of the class room. IN the classroom may be another matter. Indeed, I have been told that I am a loveable teddy bear – outside the classroom.

ENJOY
